

# Report 1 - C2TB1702

This is an example report for the Computer Aided Problem Solving class. Images will look like this:

```
Command Window
>> x = 1;
>> y = 2;
>> z = 3;
>> whos
Variables visible from the current scope:

variables in scope: top scope

Attr      Name      Size      Bytes      Class
=====
          x      1x1        8      double
          y      1x1        8      double
          z      1x1        8      double

Total is 3 elements using 24 bytes
>> |
```

Code will look like this:

```
>> x = 1;
>> y = 2;
>> z = 3;
>> whos
Variables visible from the current scope:

variables in scope: top scope

Attr      Name      Size      Bytes      Class
=====
          x      1x1        8      double
          y      1x1        8      double
          z      1x1        8      double
